

R&R Roaster and Roaster machines are proudly handcrafted by our team in Turkey.

INVERTER DRIVEN MOTORS

It protects the motors in case of any abnormally and let consume less energy. Plug in single phase and run 3 phase motors, silent run to listen only cracks. Inverter for longer life motors.

AIRFLOW CONTROL

Airflow can be increased or decreased during roasting process manually in case of need. You can control the profile's airflow parameter to reach desired taste.

STANDARD FEATURES AND EQUIPMENTS

Sampling spoon and sight window

15kg batch capacity

Drum and Exhaust temperature indicator and controller

Chaff collector

Simultaneous roasting and cooling

Faster cooling with strong cooler fan

4 MOTOR ROASTER

R15 15kg batch capacity coffee roasting machine can perform roasts simultaneously with cooling. Drum, Exhaust Fan, Cooling Mixer and Cooling Fan have separate motors.

GAS CONTROL

Burners are controlled by electronic ignition and burning system. Single push enough to start burner. In case of any abnormally on gas it stops the burner and gas for safety. Reset button helps for re-start the burner. CE certified control cards are equipped with compatible gas valves.

FLAME CONTROL

Shoproasters Flame height can be adjusted manually by Flame Adjusting knob on body. You can reduce or increase the flame height at any time of roasting process. It helps for heating power control of roasting to reach profile you targeted. Vapporize the chlorogenic acids and get the flavor. R&R Roaster and Roaster produces Artisan Coffee Roasting machines for artisan rosteries.

TECHNICAL SPECIFICATION

Batch Capacity	: 15 kg
Roasting Period	: 11-15 minutes
Dimensions	: 140 x 195 x 175 cm
Weight	: 500 kg
Voltage	: 110 / 220 / 380 V
Frequency	: 50 – 60 hz
Fuel	: Gas (LPG, Propane, Natural Gas)
Number of Motors	: 4 pcs, Drum, Mixer, Exhaust Fan,
Mixer Fan	

Audible Warning	: Audible warning when it reaches to set drum temperatures
Electrical Parts	: R&R use most common and famous brand electrical parts on machines
Safety	: We prefer CE certified parts and components on production.
Quiet Run	: Quiet run helps to hear first crack and second crack clearly by inverter driven motors

R&R coffee roasters control boards have 2 options; manuel control and touch screen PLC control. Manuel control comes with sepearate start stop buttons of each motor, burner switch and emergency stop buttons. 2 thermostat with indicators for drum and exhaust temperature.

Touch screen PLC control roasters have software developed by our R&D team to control and save drum speed, airflow, temperature. Operator can save the recipes and recall them while roasting.

R&R Roaster and Roaster machines are proudly handcrafted by our team in Turkey.
